December 15, 2018

Dear Sir or Madam,
**University of Information Technology**
**Vietnam National University – Ho Chi Minh City**

## Request for Recommendation of Students for IIST

Hosei University conducts a special examination based on university recommendation for Institute of Integrated Science and Technology (IIST). IIST is an English-based graduate program focusing on integrated science and technology.

This special examination is only available for specific partner universities and offers earlier application to the students attending the universities than the students who apply for the general examination. Please note that the applicants must be recommended by a President, a Vice-president, a dean or equivalent of their last school that they attended or graduated from.

The number of students to be accepted from each university is as follows:
--------------------------------------------------------------------------------------------------------------------------
Institute of Integrated Science and Technology

   Master's program: 1-3 students (in principal)
   Doctoral program: 1-3 students (in principal)
--------------------------------------------------------------------------------------------------------------------------

We would appreciate it if you could recommend students for IIST.

If you have any questions, please feel free to contact us ( hge@hosei.ac.jp ).

Yuko TANAKA
President,
HOSEI University.

**How to apply for special examination based on university recommendation**

1. Please kindly inform your students of our special examination based on university recommendation.

2. If there are students who want to apply for this examination, please have them contact us ( hge@hosei.ac.jp) with their educational background and the field of study that they are interested in.

   We will schedule a time for your students to contact with supervisors in Hosei University whose research fields may match his/her educational background and interest.
   Please note that your students will be required to discuss his/her research project with the supervisors and obtain their approval prior to the application period in order to avoid any mismatch between student's research interest and supervisor's research area. After their discussions are completed, we will inform the students whether they are approved for application or not directly.

3. We will make a list of students who are approved for application and send it to you. Please have the students submit the application documents following the application guidelines accordingly.
   Note: If there are two or more students who are approved for application in your university, we will inform you how to deal with this.
